Information about image publication on the Internet

The consent to the publication of photos is one of the conditions that must be met (§ 22 Art Copyright Law, right on their own image) to even have the opportunity to put photos on the Internet. This consent requires information about related risks:

- the possibility of national and international, worldwide retrieval of public and non-public images posted on the Internet;
- Danger to the informational right of self-expression of those depicted in a worldwide publication of their data, including in countries where there is no or no adequate standard of data protection, thus an adequate level of data protection cannot be ensured
- the set data can be read unnoticed and stored, modified, falsified, combined or manipulated in a variety of ways
- there is the possibility of a worldwide automated evaluation of the publication according to different search criteria, which can be arbitrarily linked (e.g. creation of a meaningful personality profile by merging information about the official position, the area of responsibility of the employee with data from private context, selection under job applications, Observation of persons)
- commercial use, e.g. danger of unsolicited mailing and harassment
- by providing the images is done principle, a waiver of the examination of the legitimate interest of the recipient in the knowledge of the data
- on storage, the recipient can continue to use the data even if the providing agency has changed or deleted their Internet offer.
